DETAILED ACTION

Response to Arguments

Applicants' election of Invention Group II, apparatus claims 63-74 and 80-96, in the response filed on 11/19/2010 is acknowledged.

Upon further consideration, the new examiner considers that both the apparatus and method claims include different embodiments of process chamber in Figs. 2-5 and Figs. 11-14 as well as different control system in Fig. 2, 8, and 10.

Applicants are free to elect on the following Species in either Invention Group I and II without being bound to the previous election.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 49-62 and 75-79, drawn to a method.

Group 2, claim(s) 63-74 and 80-96, drawn to an apparatus.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature is an in line apparatus used for a CIGS process. Figure 1 and paragraph 0018 of Delahoy (2003/0082834) teach this feature.

Each Invention Group 1 and 2 contains claims directed to the following groups of patentably distinct specie of:

Group A -- process chamber

Species A1: The embodiment of Figs. 2-5; or

Species A2: The embodiment of Fig. 11-14.

Group B – control systems

Group B1: Fig. 2; or

Group B2: Fig. 8; or

Group B3: Fig. 10.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature is in line apparatus used for a controlled CIGS process. Figure 1 and paragraph 0018 of Delahoy (2003/0082834) teach this feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Keath T. Chen whose telephone number is 571-270-1870. The examiner can normally be reached on M-F, 6:30-3:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Cleveland can be reached on 571-272-1418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
